DESCRIPTION

Rubber ramps for wheel alignment stations – comfort and durability.

Professional rubber ramps designed for precise work on wheel alignment stations. Made of high-quality, durable rubber, they ensure stable and safe entry of the vehicle onto the turntable, while protecting the floor surface from damage.

Key features:

Dimensions: length 60 cm, width 30 cm, height 5.5 cm

Fitted to most turntables used in geometry stations.

Sturdy construction made of durable rubber

Resistant to deformation, abrasion, and intensive use.

Lightweight and portable

Despite their high durability, the ramps are easy to carry and quick to set up.

Reliable grip

The non-slip structure ensures stable ramps in both dry and wet conditions.
